#### **DETAILED ACTION**

# Allowable Subject Matter

#### 1. **Claims 1-2 and 4-12** are allowed.

The following is an examiner's statement of reasons for allowance:

With regard to claims 1, 4 and 6: These claims are allowable over the prior art of record because the latter, either alone or in combination, does not disclose nor render obvious a method of forming an optical waveguide in the interior of pure silica glass comprising the steps of focusing femto-second laser pulses to form a high refractive index region, changing the mode field diameter of the waveguide by changing the pulse width and/or controlling the aspect ration of the waveguide by changing the peak power of the laser pulse along with the laser pulses abeing condensed by a condenser having a numerical aperture of approximately 0.5, in combination with the rest of the claimed limitations. The Borrelli reference teaches a range of numerical aperture of as wide as 0.15 to 0.30 only.

With regard to claims 2, 5, and 7-12: These claims are allowable over the prior art of record because they depend on allowable claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
